RE: Matador Resources \* Parker Deep 5 Fed 3 \* 30-015-32555 \* 2RP-3660 \* DOR: 4/24/16

Catherine,

Your proposal to excavate and haul impacted material to a disposal is approved, however, OCD does request additional delineation at the site. With the release footprint being relatively small, the delineation can be done prior to excavation, or, as the excavation is being performed. Please include a lateral definition as well. Chloride impact does not appear to be an issue, so additional testing for chloride will not be required. OCD requests delineation samples be obtained from the original sample points. Please advise once remedial operations have been scheduled. Federal sites will require like approval from BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
