Fenton 7 Federal #1

API 3D-015-27973

Unit returned to operation yesterday afternoon @ 2pm.  
 Dump valves were replaced before recovery to operation.  
 Multiple BOPD employees confirmed that the system  
 was operating properly & fluid was dumping into tanks.  
 Pumpers arrived to find fluid spilling from the flare  
 stack. He checked the system & noted that the  
 dump valves were closed. He opened the valves &  
 notified EHS. ~7am

Use truck recovered 20 bbls oil  
 Leak affected 840 ft<sup>2</sup> of pasture & 2064 ft<sup>2</sup> of wall pad.  
 7 bbls PM, 5 bbls oil in soil
