RE: DCP * Parkway Booster Station * **2RP-1038** * DOR: 2/15/12

Jon,

The Final Report C-141 for 2RP-1038 has been approved for closure by OCD. BLM may require additional re-vegetation efforts at the release site.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, please contact me.

Thank you,

Mike Bratcher

Subject: DCP Environmental Audit

Mr. Bebbington,

The NMOCD Artesia district has conducted an audit of the open environmental compliance permits with DCP. The results of that audit are in the attached document. It shows that DCP has 17 open RP's, including two for Duke Energy. Most of the files have been imaged and may be viewed on our website at <http://ocdimage.emnrd.state.nm.us/imaging/AEOrderCriteria.aspx> (order type will be "2RP").

The OCD requests any closure reports or documents that we may be missing, as well as any additional information on cleanup efforts made.

If you have any questions or concerns, please don't hesitate to call.
Thank you,

Heather Patterson
