RE: Mewbourne * Quick Draw 10 G #1 * 30-015-36500 * 2RP-1868

Zack,

This closure request is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Guys,

You were correct about the work done inside the battery in connection with 2RP-2312 having cleaned this spill. I've attached the sample results that I submitted alongside 2RP-2312's sample results. Unfortunately the sample map from 2RP-2312 did not include the sample locations from 2RP-1868 but I assure you it was almost in the exact same area. I understand this may be a little confusing so if you have any questions please call. Thank you.

Subject: Mewbourne Audit

Zack,

I have been conducting audits of all the environmental issues in District 2 to help clear our backlog. Mewbourne currently has 9 open RP's, most of which are pretty old. Please go over the attached list and let me know if you have any closure reports or additional information on cleanup efforts.

If you have any questions or concerns, please don't hesitate to call.
Thank you,
