RE: Corrective Action Plan
Burnett Oil Co., Inc. - Gissler B 3-3Tank Battery
UL/M sec. 11 T17S R30E

Mr. Bratcher:

The above location is approximately 2.5 miles Northeast of Loco Hills, New Mexico at UL/M sec.11 T17S R30E. The site is located in an area of no know groundwater.

In the evening of July 18, 2016, there was a release of 40 barrels of produced water, and we were able to recover approx. 10 barrels of produced water. The release was caused as a result of a transfer line rupturing. The BLM and the NMOCD were notified on July 18, 201, and the C-141 was submitted later the same day.

Corrective Action Plan

On August 3, 2016 we received verbal confirmation to scrape the surface of the impacted lease road area, approx. 70' x50'. This lease road was scraped on August 17, 2016 and the impacted material was hauled to disposal. On September 8, 2016, Burnett Oil Co., Inc. collected samples from the remaining impacted areas. The samples were taken to Permian Basin Environmental Lab for analysis.

October 4, 2016

As per our conversation on September 30, 2016, Burnett Oil Co., Inc. will remove the 0-1' impacted material from SP-2 and SP-3. Once the impacted material is removed the area will be reclaimed and the impacted material will be hauled to disposal

Following the approval of the plan, Burnett Oil Co., Inc. will submit all proper documentation to the NMOCD and the BLM in accordance to the State and Federal Guidelines set forth.

Please feel free to contact me with any questions concerning this plan request.

Sincerely,

Johnny Titsworth
