RE: BopCo * PLU 211 * 30-015-33858 * 2RP-3705

Brad,

Your proposed work plan is approved. Like approval by BLM is required for federal sites.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather,

As discussed in our meeting on 8-24-16, BOPCO had a release on the PLU 211 (5-17-16). A initial response crew was dispatched to the location following the spill to remove the saturated surface soils and collect soil samples. It was agreed upon after review of the field log and lab data that BOPCO would remove an additional 6 inches of soil from SP2. Once field activity is completed and the site is backfilled a final C-141 and closure report will be submitted. If you have any questions please let me know. Thanks
