Subject: RE: Parakeet Remediation Plan Parakeet Federal 29

RE: Fair Oil, LTD * Parakeet 29 Fed 1 * 30-015-35140 * **2RP-3897** * DOR: 9/18/16

Mr. Thomson,

Your proposal for remediation of the above referenced release is approved with the following conditions of approval:

- Federal sites will require like approval from BLM.
- It is OCD's understanding that the bio remediation will take place on the well pad and that no other surface disturbance will occur.
- Material for bio remediation is to be place in lifts not greater than 12 inches thick.
- Submit a proposal for methodology to be used to sample soils being remediated. Sampling is to take place at a minimum of 90 day intervals. After 180 days, OCD will review all analytical data and may require an alternative remediation plan if the bio remediation is not showing adequate progression.
- Sidewall samples are required to be obtained in a manner that will adequately define lateral extent of contamination in all directions.
- Notify the OCD District 2 office once remedial operations have been scheduled, and, prior to obtaining samples during the remediation phase.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike Bratcher

Subject: Parakeet Remediation Plan Parakeet Federal 29

Attached is the proposed remediation plan for the Parakeet Federal 29 which we received on Saturday from ASI. Sorry for the delay. Let me know if any additional information is needed at this time.
