Good Evening Terry,

We (BLM) will need to have an archaeological survey completed off pad around the impact area to include any areas that may be disturbed by equipment. Since this site is located within the programmatic agreement, you may have the survey completed by an independent contractor and show the impact area off the pad has been surveyed, or pay into the programmatic agreement fund. Information sheets attached. Please let me know what you wish to do prior to sampling.

This well is also on a federal lease so we will need to be kept in the loop with updates and approvals as well.

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully

reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Terri,

Thank you for responding to my earlier email. The District 2 (Artesia) NMOCD office had a field inspector on the above referenced site on 6/6/16. The attached photos are what was observed. It appears maybe more recent fluid releases along with some historic contamination are present on the site. At this time, OCD requests a Form C-141 be submitted for this site. Please report any known volumes that may have been released, but if volumes are unknown, indicate that on the form. Remediation of the site will be required according to OCD rules and guidelines. OCD records indicate the site is situated on Federal surface, so BLM is being copied on this email.

If you have any questions or concerns, please contact me.

Thank you,

Mike Bratcher

Heather,

Attached are some pics of the Latham Fed 001. API 30-015-24731-00-00. It appears that they had a release that went into the arroyo beside location.

Thanks,

Gilbert Cordero
