RE: Closure Report

**Burnett Oil Co., Inc. - Gissler A 30
UL/P sec. 11 T17S R30E**

Mr. Bratcher

The above location is located approximately 2 miles northeast of Loco Hills, New Mexico at UL/P sec. 11 T17S R30E. The site is located in an area of no known groundwater.

On February 26, 2016 a release was discovered of 8 barrels of crude oil and produced water. The release occurred when the packing on the well head ruptured, and caused the release of produced water and crude oil. The release impacted a 150' x 2'-5' area on the well location, and a 50'x1' area in the pasture on the West side of the well pad. The BLM and the NMOCD were both notified of the release on February 26, 2016 with the initial C-141 being filed on the same day.

Corrective Action Plan

Burnett Oil Co., Inc. hired Aspen Grow to aid in the remediation of the impacted area. On March 31, 2016, Aspen Grow traveled to the location to begin the remediation process. The impacted area was treated with the remediation chemical "Detox", four weeks. Once the initial applications were applied, samples were collected and taken to an accredited lab for analytical. A second application of "Detox" was applied to the impacted area of SP-1. With the second application of "Detox", we were able to collect a 0-1' sample at SP-1. The field screen for chlorides measured 600.

November 28, 2016

At this time, Burnett Oil Co., Inc. will submit a request closure for the Gissler A 30 to the NMOCD and the BLM.

Please feel free to contact me with any questions concerning this remediation plan request.

Sincerely,

Johnny Titsworth
HSE Coordinator

Describe Cause of Problem and Remedial Action Taken.*

Packing blew out - repaired.

Describe Area Affected and Cleanup Action Taken.*

Area affected: 150'x2'-5' on pad and 50' x1' in pasture. Area will be sampled and remediated to regulatory standards.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
