NATURE OF RELEASE

Type of Release Natural Gas, Pipeline Liquids	Volume of Release 24 MCF, 10 bbl	Volume Recovered NA
Source of Release Pipeline Relief Valve	Date and Hour of Occurrence Unknown	Date and Hour of Discovery 3/18/2015 @ 11:30 MDT
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher	
By Whom? Osman De Leon	Date and Hour 3/18/2015 2:52 MDT	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A pipeline relief valve opened and spilled approximately 10 bbl pipeline liquid to the ground and oversprayed the surrounding area. Neither the valve nor the pipeline were damaged during the event, and thus no repairs were required.

Describe Area Affected and Cleanup Action Taken.*

Contaminated area was marked and Microblaze was applied to allow degradation of hydrocarbons while minimizing disturbance to existing vegetation. Soil and vegetation samples were collected from the overspray area to demonstrate concentration of pollutants is below NMOCD remediation levels. Soil samples were also collected on liquid flowpath, with chloride concentrations slightly above NMOCD remediation levels. Given that groundwater is more than 100 ft below the surface, the chloride contamination is unlikely to pollute groundwater at the location.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
