NATURE OF RELEASE													
Type of Release: Produced Water Source of Release: 12" water transfer line							Volume of Release: 20bbls Volume Recov						
Source of Release; 12" water transfer line							Date and Hour of Occurrence: Date and Hour of Discovery: 7/26/2016						
Was Immediate Notice Given?						If YES, To Whom?							
By Whom? Christine Alderman						Date and Hour: 7/27/2016							
Was a Watercourse Reached? ☐ Yes ☒ No						If YES, Volume Impacting the Watercourse.							
			i .										
If a Watercourse was Impacted, Describe Fully.*													
Describe Cause of Problem and Remedial Action Taken.* A 12' poly water transfer line just in Texas just south of the New Mexico/Texas state line ruptured resulting in the release of approximately 20bbls of produced water. Vacuum trucks were utilized to recover approximately 10bbls of standing fluids. A backhoe was mobilized to the site to begin scraping up impacted soil. Describe Area Affected and Cleanup Action Taken.*													
The release occurred in Texas and flowed north into New Mexico for approximately 780'. The fluid was contained within an erosion ditch which varies between 3 and 8' wide. A backhoe was immediately dispatched to the site to scrape up impacted soil. On January 30, 2017 soil samples were taken within the impacted erosion ditch. The results of the soil sampling indicated that all of the soil above NMOCD RRAL's was successfully removed.													
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
