RE: 2RP-4108

Karolina,

In this instance, since it is a relatively small amount of material, OCD will approve your request, if BLM is OK with it as well. If so, I will approve your request for closure of 2RP-4108.

Thank you for your cooperation,

Mike Bratcher
NMOCD District 2
811 S. First St.
Artesia NM 88210
575-748-1283 Ext 108
mike.bratcher@state.nm.us

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: RE: WPX RDU 33 - final C-141 report

Good morning Mike,

I would like to request permission to blend the top 6" with clean soil and reuse at another location for surface maintenance. With your prior approval, the material would be used within the existing disturbance and will not affect vegetation.

Please let me know if this proposal is acceptable to OCD.

Thank you,

RE: WPX * RDU 33 * 2RP-4108 * DOR: 1/2/17

Karolina,

OCD requests removal of material in the spill path, through the 6" interval. Once completed, let me know via email and this incident will be approved for closure.

If you have any questions or concerns, please contact me.

Thank you,

Subject: RE: WPX RDU 12 - initial spill notification

Good morning,

WPX had a spill yesterday, 1/12/17, at the RDU 33 tank battery; 30-015-40623 J-22-26S-30E. The spill was caused by human error. A valve on the unloading line was left open which resulted in a 100 bbl spill into lined SPCC containment. Unfortunately, the liner has a hole on the southeast corner and a small volume (less than 1 bbl) leaked out of the containment. I will submit the C-141 report within 15 days of the incident.
Thank you and have a great weekend,

Subject: WPX RDU 12 - initial spill notification

Good morning,

WPX had a spill yesterday, 1/11/17, caused by human error; stuffing box failure. Approximately 12 bbls of oil and water was spilled with 4.5 bbls recovered from the pad. The spill migrated west of the pad, entered a dry drainage and migrated for about 100 yards. Due to access constraints, we were unable to vacuum the free standing oil from the drainage. To prevent from further migration, the oil was absorbed with dirt. The impacted area was GPS-ed and the end of the impacts in the drainage was additionally marked with a flag. We will start the excavation activities once I receive your approval. The line locate call was placed yesterday and we should be ready to go by Monday.

Please let me know if you would like an onsite prior to the excavation activities. We will do our best to minimize the impacts but, unfortunately, I think we will damage some vegetation during this cleanup.

Please let me know if you have any comments and suggestions.
Thank you for your help,
