RE: Devon Energy * Shakespeare 20 Fed 1H * 2RP-3360 * DOR: 10/18/15

Kimberly,

Your proposal for remediation of the above referenced release is approved. OCD requests the excavation extend to the area immediately around the well head, as practicable. Also, attempt to perform a more complete delineation for chloride impact in the excavated area. Field screens may be used for this purpose, with lab confirmation on the deepest sample obtained. Federal sites will require like approval from BLM. Please advise once remedial activities have been scheduled.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
