Crystal,

The soil within the overspray area is below RRAL's. Therefore I don't believe there is any need for resampling in 90-days. The purpose of the Micro-Blaze is simply to address the staining on the vegetation. What are your thoughts?

Respectfully,

Sheldon Hitchcock

Sheldon,

I apologize I forgot to mention that the OCD requests follow up samples be collected around 90 days from when treatment will be conducted in the overspray area that is to be treated with micro-blaze.

Thank you,

Crystal Weaver

Hello Sheldon,

Your proposal for remediation of the above referenced release is approved. Please advise once remedial activities have been scheduled.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Thank you,

Crystal Weaver
