Nathan,

Per your request. That is the salt section you are seeing the high chlorides in. Very normal, I even tasted it. Samples were collected every 20-feet, groundwater was not encountered.

Please let me know if we can do anything else for you on the subject.

Respectfully submitted,

David

Soil Profile

<u>Depth</u>	<u>Description</u>
20-feet	Dark red/brown caliche
40'	Red/brown silty sand
60'	Red/brown silty sand and caliche
80'	Gray silty sand
100'	Red/brown silty sand
120'	Red/brown slightly clayey sand and caliche
140'	Brown to red/brown, dense anhydrite and gypsum
160'	Gray to light pink gypsum
180'	Light red/brown slightly clayey sands and salt
200-260'	Light red/tan sands and salt
