Subject: RE: [EXTERNAL] RE: Goodnight Closure
Attachments: Goodnight Closure Report.pdf

Mike,

I apologize for overlooking this, luckily the 1.7 million chlorides was a typo. I got the corrected version from Bob but it looks like I failed to forward it onto Heather and you all. Also, I apologize for not attaching you to the email from October, I have attached that closure now. I will work to get you a better closure report. I have spoken with the excavation guys on this and know what all was done now. I hope to have something to you earlier next week. The closure attached in October obviously doesn't speak to the questions Heather had concerning depths and blends. I apologize for the oversight.

Thanks,

RE: 2RP-564 & 2RP-812

Brett,

It looks like your email to Heather dated October 28, 2016 (last email in this chain) included a closure report and the Final C-141s. I wasn't copied on that email, so I don't have those documents. Please resend to me. That document initiated her questions/request, and you responded to that request on 12/2/16. That is where this stops on our end.

Some questions I have in regard to that response is: The first attachment in your response (12/2/16) is titled Sample Points Map and Test Results. I have two issues with that document. The page that shows the analytical tables ("Analysis Results: Lab and Field Tests") references a sample point labeled "AH-1". It shows AH-1 @ 1' returning a value of 1,743,164 (assume mg/kg). I would expect that is a misprint? Also, AH-1 is not shown on the map. There is a sample point labeled SP-1 and it is in bold black type, similar to AH-2. I believe this is also likely a misprint. If these are misprints, just include a statement when you send the closure report and Final C-141s stating such.

Heather had also asked for clarification as to excavation depth and what soils were hauled to disposal vs what was blended. My recollection of this project is that hauling soil to disposal is where things went south with the surface owner. I don't think anything was hauled to disposal, but we need to know that from you guys. Also, I am inclined to request obtaining something from the surface owner stating he is OK with, or signs off on, what was done out there.

Let me know what you think, or if we need to discuss further.

Thanks,

Crystal/Mike,

This was one of the last things I worked with Heather on before she left. Do either of you know a status on the closure of this one? The PA is pending from the state on it due to this open release.

Thanks,

Brett,

Were you able to find the information I needed on this?

Brett,

Please send me the work plan that was approved by Jim Griswold. Also, please send a site map detailing where 2016 samples were taken, depth of excavation, and which soils were hauled off versus blending.

Thanks,

Subject: Goodnight Closure

Heather,

Attached please find closure documents and C-141's for two releases at the Goodnight. If you have any questions please feel free to give me a call at 432-301-3223, I have associated approval documents of this plan from Jim to Devon personnel if you need that as well. This is another location that the OCD is waiting on environmental clearance before releasing the reclamation.

Thanks,
Brett Fulks
