Bob,

Your request for closure of the above referenced release is approved. It is OCD's understanding that some volume of impacted material was excavated soon after the release.

If you have any questions or concerns, please contact me.

Thank you,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mike,

Attached is documentation for a release that occurred in 2010 and I apologize, I had not followed up on. Today, Jeremy Haass was at a meeting in BLM/Carlsbad Field Office and was approached by Randall Pair about the location and issues with an open excavation and downed fencing.

If you could review the attachment at your earliest convenience to determine if the NMOCD will approve the closure so EOG can get the excavation backfilled.

Please call me if there are any further questions.

Thank you,

Robert C. "Bob" Asher
