RE: Lime Rock Resources * WRLU 56 * 2RP-4184 * DOR: 4/17/17

Greetings,

The Talon proposal for remediation of the above referenced release is approved. Due to the flow line manifold's proximity to the Pecos River, OCD would strongly suggest Lime Rock consider placing the equipment in a lined, well bermed area that would contain any potential future releases. Please advise once remedial activities have been scheduled.

If you have any questions or concerns, and for notification, please contact me.

Thank you,

Mike Bratcher

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mr. Bratcher,

The work plan for the West Red Lake Unit #56 is attached. As you will see we did have some high background chloride concentrations. Please review everything and let me know if you have any questions or concerns.

Respectfully,

Sheldon Hitchcock
