RE: COG Operating * Puckett 13 Fed Tank Battery * 30-015-40737 * 2RP-4073 * DOR: 1/6/17

Greetings,

The Tetra Tech proposal for remediation of the above referenced release is approved. Please obtain representative sidewall samples as practicable (or samples just outside the visually identified impact area) for lateral definition of chloride impact. For this release, field screens may be utilized for this determination. Please include this data in the closure report, and, advise once remedial activities have been scheduled. Federal sites will require like approval from BLM.

If you have any questions or concerns, and for notification, please contact me.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: COG - Puckett 13 Federal - Work Plan Approval Request - 2RP-4073

Good Morning,

Attached is the work plan for the COG – Puckett 13 Federal, located in Eddy County, New Mexico. Once approved, COG will implement the proposed work plan. Let me know if you have any questions or concerns.

Thank you,

Clair Gonzales
