RE: WPX * RDU 11 * 2RP-4197 * DOR: 4/20/17

Karolina,

OCD approves your proposal for characterization of impact for the above referenced release. OCD is OK with the proposed additional excavation, pending BLM approval.

Thank you,

Mike Bratcher
NMOCD District 2
811 S. First St.
Artesia NM 88210
575-748-1283 Ext 108
mike.bratcher@state.nm.us

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations

Subject: RDU 11 - C-141 - characterization plan

Good morning,

Attached is the RDU 11 characterization plan with the initial sampling results. Also, with this submittal, I would like to ask for BLM's permission to excavate the impacted area to 4' below the original surface elevation. Once the area is excavated, it will be evaluated again.

Thank you and have a great weekend,

Hello Karolina,

Sorry about that. I really don't know how I even did that. But, anyways, here is the correct one. Thank you for catching that.

Also since I got a bit behind on sending out this set of COAs, let's move your due date on your delineation to 6-16-17.

Hope you are having a good day.

Sincerely,

Crystal Weaver

Good morning Crystal,

I'll look into the old spill and try to find more information.

You sent me the same attachment but with two different names. Would you please send me the COAs for the most recent spill so that I know the due date for the delineation plan?

Thank you,

Karolina Blaney

RE: WPX/RKI * RDU #11 * 30-015-24307 * 2RP-4197

Karolina,

I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an attached Conditions of Approval. The OCD tracking number for this event is 2RP-4197.

PLEASE NOTE: I was also looking in the files for this site location to see if there were any old remediations that we needed an update on and I came across case number 2RP-2286. I attached the original C-141 to this email. That is all we have on record for this case. It is from before you came over to NM I think (2014), but if you have any additional information on it, it would be great if you could share it so we can move forward to hopefully closing this one out.

Thank you,

Crystal Weaver

Subject: RDU 11 - initial spill notification

Good morning,

WPX had a spill yesterday, 4-20-17 at 1:20 pm at the RDU 11 pad. API # 30-015-24307, qtr/qtr O-S22-T26S-R30E. The spill was caused by human error; the equipment setup was changed and the calibration guys were given a wrong information. They closed a valve that should've been open which resulted in over-pressuring an above ground poly line. Approximately 50 bbls of oil and water was spilled off location north and west of the location. All free liquids were recovered with a vac truck and the recovered volume will be included in the C-141 report.

WPX would like to ask for BLM's permission to excavate the top 1-2' of the impacted area to prevent from vertical migration. The area will be sampled after the excavation activities are completed. There are no arch sites at the spill location.

Please let me know if you need any additional information.

Thank you and have a great weekend.
