We have placed berms across bottoms already. I will monitor and if I see any change in soil composition, I will add more further up.

RE: Apache * EAU Emulsion Line * 30-015-22834 * 2RP-3572 * Phase One Pilot

Jennifer,

Your proposed work plan for the phase one pilot of the EAU Emulsion line release is approved. The OCD would also like to see efforts made to prevent surface runoff in the areas NOT covered by phase one of this project.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

I added the sampling plan during the project.
