Randall,

I did receive the hard copy of this proposal via USPS today. I don't believe the BLM will be involved in this project, but let's keep Mr. Amos in the loop until they have had a chance to respond. Do you have approval from BLM or OCD for the work that has been performed at this site? After a really brief review of the proposal, it appears there is a large volume of "stockpiled" impacted material and a bioremediation area already constructed. Please advise.

Thanks,

Mike Bratcher

Mike

I attach the Remediation Report required by Part 29 for 2RP-1816.

This was due on September 13, but we did not have all laboratory results fully evaluated at that time. I should have asked for an extension then. Please consider this email a request for the extension of time to submit the remediation plan until today.

Once again, I have given you something to think about – more AMIGO simulations. How about I come down to Artesia and give a 2-hour show and tell about AMIGO?

Paper copy in the mail today. Report is transmitted to BLM and SLO via this email.

Have a good weekend.
