Christine,
The OCD never got a C-141 for this event. Can you please turn one in as soon as possible?
Thanks,
Heather

Subject: Marquardt Fed 12 (API 30-015-41850)
Randy/Heather,
This morning we discovered a leak at the above named location. Approximately 2D bbis of produced water was released from a faulty 4" check valve. The valve has been replaced and we are in the process of recovering fluids.
The fluids followed the ROW and is approximately 1" wide for 500 yards, then pools up. We are planning to go in with a hydrowac and get the impacted soils up as quickly as possible before they go deeper. We will then go back and sample.
Please let me know if either of you have any issues with this. Thanks!
Please see yellow line on map below.
