Ms. Weaver/Ms. Groves,

A final inspection has been conducted regarding the clean-up efforts made at the above mentioned lined facility. Free fluids were removed and if present the impacted gravel was removed from the liner and taken to a NMOCD approved disposal facility. The liner was inspected for damage and found to have liner integrity to contain free fluids. Please see the attached Final C-141 and photo taken during the final inspection conducted by a COG HSE representative. Rainwater was present inside the lined facility during the final inspection.

Thank you,

Aaron Lieb
