BLM will concur with NMOCD approval under the understanding the entire location will have a liner placed at 2' bgs to prohibit chloride migration. This site is in gypsum soils with high karst features that need to be protected.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

RE: Lime Rock Resources * West Red Lake Ut 25 * 2RP-4315 * DOR: 6/28/17

Kimberly,

Your proposal for remediation of the above referenced release is approved. OCD would prefer all liner placement be at 4' bgs. In this instance, OCD would request that Lime Rock place a permanent type placard at the site entrance, indicating the existence of the liner at 2'.

Federal sites will require like approval from BLM. It is OCD's understanding that mobilization for remedial activity is scheduled for 11/15/17.

If you have any questions or concerns, please contact me.

Thank you,

Mike Bratcher

RE: Lime Rock * West Red Lake #25 * 30-015-00819

Mike and Henryetta,

Attached please find the work plan for the above referenced location. We would like to begin this remediation as soon as possible.

Thank you.

Respectfully,

Kimberly
