RE: 2RP-4390

Heather,

Is there any chance at all of getting a better delineation (with 600 mg/kg chloride being target goal) at L1 &/or L2?

**Subject:** Ford State #2 2RP-4390 backfill request

Good Afternoon,

After hydro-excavating this location, we still returned some elevated chlorides. Due to the proximity to pipelines and the hard-pan rock layer, further remediation is not practicable. At this time we would like to request backfill so we can then establish a healthy vegetative layer to aid in the stabilization of the remaining contaminants.

Thank you,

Heather Patterson
