Ms. Tucker,

We are currently working this site. We have completed the excavation and waiting on lab confirmation. Please let me know if you have any questions or wish to discuss. Thanks and have a good day.

What is the status of this clean up?

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues

with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

RE: Apache Corp. * Barnsdall Fed Battery * 2RP-4202 * DOR: 4/24/2017

Greetings,

Your proposal for remediation of the above referenced release is approved with the following:

- It is OCD's understanding that the impacted area will be excavated to a total depth of 4' and that all excavated material will be, or has been, taken to an OCD approved disposal site.
- Representative confirmation samples are to be obtained from the sidewalls and floor of the excavation. More than one sample point at each will be required. Confirmation samples are to be lab tested for BTEX (8021), TPH (8015 EXTENDED RANGE), and Chloride, (300). OCD review of confirmation data is required prior to liner installation and backfill.
- Like approval from BLM.

If you have any questions or concerns, please contact me.
