Denise,

Please be advised that you will need a right of entry from our office before any groundbreaking work is done in the pasture. You will need to contact Conrad Kegel in our Santa Fe office to obtain this. I have copied him on this e-mail for your convenience.

Thank you,

### Amber Groves

Cambrian Management \* Dorstate SWD \* 30-015-23728 \* 2RP-4364

Denise,

Sorry for the delay on sending this one out. I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an attached Conditions of Approval. The OCD tracking number for this event is 2RP-4364. **Please remit a site characterization plan or advise OCD of plan of action by no later than 9/29/17.**

**Please note:** I have attached the email that Amber Groves with the State Land Office originally sent requesting follow up from you all regarding these spills. In her email she asks for follow up on an old case numbered **2RP-3687**, OCD would also like an update on this release. Also on this current C-141 (for the current case number 2RP-4364) is the volume reported sufficient to address what was released for both releases that Amber Groves from the SLO identified? Did the releases Amber photographed happen at the same time? Let me be clear OCD is fine with you all putting it on one C-141 if you can answer yes to the two questions I asked above, but if you all only have one C-141 filed then both of these releases need to be remediated at the same time. If that is not intended then OCD needs a separate C-141 for the second release so that we can track them separately. Please advise on what Cambrian intends regarding this matter.

Thank you,

**Subject:** Pyote Dorstate SWD

Good Afternoon,

Attached please find photos of recent releases at the above location. There is also an open RP (2RP-3687), that has been open for over a year. Please advise when NMOCD and NMSLO will receive an initial C-141 for the two new releases and what the status of the remediation is on the other open RP.

Thank you,
