Subject: Re: [EXTERNAL] FW: 1RP-4418 - Polaris B Federal #005 - Soil Investigation Summary and Proposed Remediation Workplan
Attachments: 17s30e water depth.pdf

Good Morning,

So, I'm pretty sure this isn't mine,,... but I figure I might as well take it.

In the work plan, it states that water is over 300 ft. below ground surface. Can you provide the source as an attachment to the work plan? According to the New Mexico Water Rights Reporting System (NMWRRS), water depth is 80 ft.

Work plan will be approved with requested water data attachments inserted in the work plan. Thanks.

*** Lesser Prairie Chicken (LPC) timing stipulations are in effect 1 Mar- 15 June annually.

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Also, the RP number seems to be assigned to a Matador release.

Ms. Price,

Is this one of your sites? I haven't received any correspondence from the BLM on this release. I just know that Shelly assigns most of our spills to you.

Thank You,

Becky Haskell
