Subject: RE: Revised Spill Remediation Plan - Indian Basin Station 210 (2RP-4332)

RE: 2RP-4332

Ben,

I forgot to add a condition of approval for the above referenced release. OCD will require confirmation samples to be obtained from sidewalls, or an area just outside the indicated impacted area, in a manner that will confirm lateral/horizontal definition of impact has been achieved.

Thank you,

Mike Bratcher

Subject: RE: Revised Spill Remediation Plan - Indian Basin Station 210 (2RP-4332)

RE: OXY USA * Indian Basin Station 10 * 2RP-4332 * DOR: 7/17/17

Ben,

Your revised proposal for remediation of the above referenced release is approved with the following:

- Target goal for chloride impacted material will be 600 mg/kg (left in place without a liner)
- Any liner placement must be at a minimum of 4' bgs.

Federal sites will require like approval from BLM. Please advise once remedial activities have been scheduled.

Thank you,

Mike Bratcher

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In

addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Revised Spill Remediation Plan - Indian Basin Station 210 (2RP-4332)

Mr. Bratcher, Ms. Weaver & Ms. Tucker,

Trinity Oilfield Services, on behalf of OXY USA, Inc., is pleased to submit the attached *Environmental Site Summary & Spill Remediation Plan (Revised)* for the Indian Basin Station 210 release site in Eddy County (2RP-4332). Trinity is prepared to begin the proposed remediation activities upon your review and approval.

If you should have any questions, comments, or concerns, please do not hesitate to contact me by telephone or email.

Thank you for your time and consideration.

Respectfully,
Ben J. Arguijo
