RE: Cimarex Energy * Gadwall 18 Fed Com 1 * 2RP-3939 * DOR: 10/12/16

All,

OCD will accept this proposal with the following:

This site is situated in a BLM mapped High Karst area, which is an exceptionally bad area to have a net 130 bbl oil loss. The most recent analytical data is now nine months old, with the release having been discovered over 1.5 years ago. OCD requests samples be obtained from all excavation bottoms at the base/floor of the excavations, and at 1' and 2' below excavation bottoms, and at 1' vertical intervals on all sidewalls, at a minimum. Based solely on the analytical data provided, the main area of concern is the 2-3' interval in BH-1. Please submit a report after work has been completed, outlining what was accomplished, along with the confirmation sample data. Also, advise once remedial activities have been scheduled.

If you have any questions or concerns, please contact me.

Thank you,

Mike Bratcher
NMOCD District 2
811 South First Street
Artesia, NM 88210
575-748-1283 Ext 108

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
