RE: COG \* GJ West COOP Ut 108 \* 2RP-4351 \* DOR 8/7/17  
GJ West COOP Ut 011 \* 2RP-4454 \* DOR 10/15/17

Joel,

Your proposal for remediation of the above two referenced releases is approved. Please provide notification, as practicable, for commencement of each phase of the project. Liner placement must be a minimum of 4' bgs. Advise type of liner being utilized, once that decision has been made. Federal sites will require like approval from BLM.

Thank you,

Mike Bratcher  
NMOCD District 2  
811 South First Street  
Artesia, NM 88210  
575-748-1283 Ext 108

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

---

**Subject:** 2RP-4351 & 2RP-4454 - GJ West Coop Unit #108 and GJ West Coop Unit #011

Please find attached the *Soil Investigation Summary and Proposed Remediation Workplan* that has been prepared for the GJ West Coop Unit #108 (2RP-4351) and GJ West Coop Unit #011 (2RP-4454). The sites are located adjacent to each other in Unit Letter "E", Section 28, Township 17 South, Range 29 East in Eddy County, New Mexico. Upon receiving NMOCD and BLM-approval, TRC is prepared to begin remediation activities as outlined in the attached *Workplan*. Upon completion of Remediation Activities, a *Remediation Summary and Risk-Based Soil Closure Request* will be prepared detailing field activities and laboratory analytical results from confirmation soil samples. If you have any questions or need any additional information, please feel free to contact Becky Haskell or myself by phone or email. Thanks!
