Kyle & Team,

Thanks for the call on this. I apologize for letting this request fall into the black hole that is my email/Outlook system. OCD approves your request for backfill and closure of the above referenced release. Federal sites require like approval from BLM.

Thank you,

Mike Bratcher

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

**Importance:** High

Mike and Others,

Please find the attached report and closure request documenting remediation conducted at the BEU DI-2 #002H. The work was conducted to address the historic spill with the RP number of 2RP-3382. XTO is requesting URGENT backfill approval from the NMOCD and BLM. There are two open excavations on site, and XTO respectfully requests your help to review the report as soon as possible in order to facilitate drilling operations.

Please let us know if this can be expedited and if you have any questions, you can contact myself or Kyle Littrell at XTO. We are available today to answer any questions that you may have.

Thank you
