Subject: RE: Cool-Ox SDS Application Candelario Polyline Release

I will be in New Mexico on Monday and can meet with you onsite Monday afternoon or Tuesday before 2:00 pm. Let me know if you are interested in meeting at the spill site and when you could possibly be there.

Thank you

Subject: Cool-Ox SDS Application Candelario Polyline Release

Please find attached the SDS for Cool-Ox, which is the treatment that we plan to use on the inside of the concrete forms on Fishermans Lane to treat the oil stained rock/soil that still remains. I have also included a link to their website. The Cool-Ox is mixed with water and applied to the impacted area and acts as an oxidizer. It is applied by low pressure application therefore should not be a lot of overspray. We would ensure no runoff to the Pecos River. Please let me know as soon as possible if we can move forward as I have to order by this afternoon to be able to apply it on May 19, 2018. Please call me to discuss if you have any questions.
