Subject: South Culebra Bluff Unit No. 5-B C-141 Release Notification; API#30-015-22922 - Rockcliff Energy Operating New Mexico LLC
Date: Sunday, September 16, 2018 5:38:05 PM

Lease operator discovered a release today, September 16, 2018, at the SCB #5 Facility due to a failure of the 4" polyline that transfers produced water from the SCB #5 facility and Amoco facility to the Candelario SWD 24 #1. We are investigating the cause and will include in the C-141. Currently estimate 40 bbls of produced water was released from the polyline into the same area as the release that occurred on April 27, 2018, behind the tank battery.

I will complete a C-141 and submit as required. Let me know if you need any additional information.

Thank you,

John Turner
