Hello Mr. Raley,

OCD has received the Closure Report and C-141 for 2RP-4673, thank you! This closure is approved. Note ODC has determined depth to ground water for this site to be at 57 feet. Additionally, the background samples show spill contamination and therefore cannot be used as a reference and should be remediated in the future. Please let me know if you have any questions.

Best Regards,

Maria Pruett

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Good Morning,

Please find enclosed the remediation closure report and request for the above noted site. As a note, the excavation is currently open pending closure approval. Please do not hesitate to contact Jim or myself if there are any questions or clarification required.

Cheers,
Dhugal
