Subject: RE: Section 16 aboveground storage tank - 2RF - 117
Attachments: C-148FINAL 2018 February.docx; C-148FINAL 2018 March.docx

Good afternoon Mike,

Attached are two C-148 reports with water throughput volumes for the RDX Section 16 aboveground storage tank (2RF-117). As explained in the approved C-147 permit, this tank is used to store produced water prior to treatment for solids, hydrocarbons and bacteria. Treated water is then transferred to the existing RDX Section 16 facility (2FR-109). Therefore, the throughput volumes for this tank and the recycling facility are the same.

Please let me know if you have any questions or concerns.

Thank you,

Karolina Blaney
