Subject: [EXT] RE: WPX - Santa Fe Fed 8 - liner inspection notification

Mike,

Thank you I have attached the initial C-141 for this incident. We have not inspected the liner yet. Vertex will conduct an inspection of the liner as originally intended and provide 48 hr notification. Should the liner be in good condition we will provide closure with pictures etc. within the 90 day window, otherwise we will provide a remediation plan.

Thank you for working with us on this incident.

Jim

It looks like I wasn't copied on the initial C-141, so I don't have it. If you would, please send that to me and I will get it in the system. If you guys have already done the liner inspection, you can go ahead and fill out the closure portion and we can open and close this at the same time. Please include a couple of photos showing the liner post cleanup/inspection.

Thanks,

Mike Bratcher

CAUTION: This email was sent from an EXTERNAL source. Use caution when clicking links or opening attachments.

Good Morning Ms. Blaney,

OCD has not received all documents required for C-141 Release Notification and has not been processed. At this time WPX is not in compliance with 19.15.29 NMAC. This creates issues with this liner inspection and any remediation/closure activities.

Best Regards,

Maria Pruett

Subject: WPX - Santa Fe Fed 8 - spill notification

Good afternoon,

WPX had a spill last night, 10/31/18 at 9:30 pm, at the Santa Fe Fed 8 SWD. API # 30-015-27126, A-35-22S-28E. Injection pump stopped working due to power outage which resulted in overfilling the tanks. The majority of the fluids was contained inside lined SPCC containment berm; the berm overfilled and fluids impacted soil on the pad. 540 bbls were recovered from the containment and ~70 bbls off the pad. We will start the cleanup activities as soon as the line locates are completed.

Please let me know if you have any questions or suggestions.
Thank you and have a great afternoon,
