Attachments: 711 Battery Work Plan.pdf; Work Plan.pdf

Good Morning,

I emailed the attached work plans on the above reference clean ups in December. Could I get an approval or the conditions, in order to remediate these sites. At your approval; Breitburn will proceed with proactive measures to remediate these sites. Also, pursuant to the new guidelines, I believe that no further action would be needed for the State 647-711 Battery. The lines were immediately shut in, and a vacuum truck utilized to recover most of the fluid. Please review and advise me accordingly.

Thank you

Best Regards,

Rebecca Pons
