RE: **1RP-5362**

Kayla,

You are approved to proceed with the proposed sampling interval for this site. In the future, be aware that the rule requires the responsible party to show "good cause" when requesting a variance, so it would help to include depth to ground water information, net volumes lost, or any other documentation that may help validate the variance request.

If you have any questions or concerns, please contact me.

Thank you,

Mike Bratcher

**Importance:** High

Mr. Bratcher,

I was following up on the sampling plan variance status to see if we could get approval for the 400 square feet composite sampling at the bottom of the excavation for 1RP-5632 COG Macho State 1. Additionally, we are beginning excavation on the site and performing the work at risk and sampling as the work progresses.

Please let me know if you have any questions or concerns.

Mr. Bratcher,

Attached is the alternative sampling plan for the above referenced site for your review. We are asking to have 400 square feet composite samples for the bottom of the excavation, instead of the 200 square feet composite samples. The site has been gridded to approximately 400 square feet and is representative of the release with an anticipated 12 composite samples to be collected. Please review and let me know if you approve or have any questions.

Thank you,
