Ashley,

LT Environmental's closure report for the above release, requests to backfill the existing excavation and complete remediation during any future major pipeline construction/alteration or final abandonment, whichever occurs first. The areas requested for deferral are identified on the site map as "SS01" and "SW05". The areas have been delineated and documented in the report. At this time, OCD approves this request. The Final Report C-141 will be accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue. This is a Federal site and will require like approval from BLM.

Thank you,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
