Mr. Bratcher,

The Myox 8 State #4H Tank Battery is on the same pad as the SRO State Com #43, please use the API # for the Myox 8 State #4H. Let me know if you have any additional questions or concerns.

Thank You,

Becky Haskell

Subject: [External] RE: (C-141 Initial) Myox 8 State #004H 12-22-2018

**** External email. Use caution. ****

DeAnn,

I noticed there was not an API number listed on this C-141. Running the lat/long, it appears the release was on the SRO St Com 43H (30-015-41141), but evidently from a flowline originating at the Myox 8 St 4H (30-015-41924) as listed on the form. The Myox is approximately 1500 yds to the north of the SRO. Do you want us to use one of these API numbers to enter this spill report under?

Thanks,

Mike Bratcher

Mr. Bratcher/Mr. Mann,

Please find the attached C-141 for your consideration. Also, attached is the calculation sheet to determine the estimated release volume. The liquid lost estimate is based on the spill dimensions, estimated depth of fluid (wet soil depth) and type of formation. The spreadsheet will calculate the volume lost in the ground and does not include the recovered amount in the calculation. The calculated volume in the ground and the volume recovered were added together and reported on the C-141. If you have any questions or concerns please do not hesitate to contact me.

Thank you,

DeAnn Grant
