Mr. Bratcher,

Under the new spill rule a work plan or closure report is due for the above release (90 days from the release date) on 1/27/19. COG has conducted an initial investigation. Delineation was not achieved and additional sampling is required. COG is requesting a three month extension until April 26, 2019 in order to conduct further delineation sampling and prepare a work plan.

Please let me know if you have any questions or concerns.

Thank You,

Ms. Pruett/Mr. Mann,

Please find the attached C-141 for your consideration. Also, attached is the calculation sheet to determine the estimated release volume. The liquid lost estimate is based on the spill dimensions, estimated depth of fluid (wet soil depth) and type of formation. The spreadsheet will calculate the volume lost in the ground and does not include the recovered amount in the calculation. The calculated volume in the ground and the volume recovered were added together and reported on the C-141. If you have any questions or concerns please do not hesitate to contact me.

Thank you,

*DeAnn Grant*
