C-141 Tomb Raider 1-12 Fed 718H. DOR: 09/05/2018

Mr. Lowry,

OCD has received the initial C-141 for Tomb Raider 1-12 Fed 718H, thanks. Unfortunately, we cannot process your C-141 because the system requires an OGRID number (oil and gas report ID) to issue an RP#. In the OCD database, the responsible party for Tomb Raider 1-12 Fed 718H API # 30-015-44811 is Devon Energy Production Company. To continue processing this release, Devon Energy Production Company must send a signed initial C-141 for this spill.

Looking forward, when you send a C-141 please, use the pdf version (see attachment) of the C-141.

Finally, Site Assessment/Characterization/Closures Reports for District I-Hobbs should be sent to:

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] FW: 2RP- pending - Tomb Raider 1-12 Fed 718H - Site Assessment and Proposed Remediation Plan

Please find attached the *Site Assessment and Proposed Remediation Plan* along with the applicable pages from the Form C-141 that has been prepared for the Release Site known as the Cotton Draw Unit 506H (1RP-4995). The Release Site is located in Unit Letter "A", Sec. 1, Township 23 South, Range 31 East, on land administered by the New Mexico State Land Office. The release was originally reported by Devon Energy, as it was on one of their locations. With your permission, we ask that the original C-141 be replaced with the attached C-141, which is reflective of the responsible party.

If you have any questions or need any additional information, please feel free to contact me by phone or email. Thanks.

Respectfully,

Joel Lowry
