Subject: RE: Remediation Plan Approval - Fluid Delivery - Tomb Raider 1-12 Fed 718H - (2RP-4995) 9-5-2018

Hey Joel,

I assumed this was entered as a spill in Eddy county, but there is already another spill with this 2RP-4995 number. It might have been entered as (1RP-4995) originally, but the spill did take place in District 2, so we will need to make the necessary changes. Let us do some research and get back to you on possibly creating a new RP number for this one.

Thanks

Joel,

We have received your Workplan/Remediation Proposal for **2RP-4995 Tomb Raider 1-12 Fed 718H**, thank you. The only issue that I had was excavating deeper than 18" at point SP #3, which you addressed in your report. This Workplan/Remediation proposal is approved.

Please let me know if you have any further questions.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] FW: 2RP- pending - Tomb Raider 1-12 Fed 718H - Site Assessment and Proposed Remediation Plan

Please find attached the *Site Assessment and Proposed Remediation Plan* along with the applicable pages from the Form C-141 that has been prepared for the Release Site known as the Cotton Draw Unit 506H (1RP-4995). The Release Site is located in Unit Letter "A", Sec. 1, Township 23 South, Range 31 East, on land administered by the New Mexico State Land Office. The release was originally reported by Devon Energy, as it was on one of their locations. With your permission, we ask that the original C-141 be replaced with the attached C-141, which is reflective of the responsible party.

If you have any questions or need any additional information, please feel free to contact me by phone or email. Thanks.

Respectfully,

Joel Lowry
