Subject: RE: [EXT] OXY Turkey Track 4 3 State 33H - Delineation Workplan Approval (2RP-5060) (10/24/18)

Good afternoon,

NMSLO will also approve of this workplan with the following comments:

- My database indicates this is in medium karst, not low as the report states. I am using the CFO karst layer. If you have different shapefile this data, let me know. BLM treats medium karst areas are treated using the strictest remedial levels in Table 1 regardless of depth to groundwater. NMSLO will also apply this standard.

The spill has been delineated to 600ppm chlorides, so delineation is complete. I don't think it will result in altering your remediation plan as written. Let me know if you have any question.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] OXY Turkey Track 4 3 State 33H (2RP-5060) - Delineation Workplan

All,

Please find the attached Delineation Workplan and remediation proposal for the Oxy Turkey Track 4 3 State 33H (2RP-5060). OXY is requesting that you review this plan and is looking forward to the OCD's and SLO's approval.

If you have any questions, please let me know.

Thanks, Cliff
