RE: 2RP-5133

Rebecca,

Your request for an extension to June 7th, 2019 is approved.

Thank you,

Robert J Hamlet
State of New Mexico

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] (Extension Request) Windmill 32 Federal Com #004H (30-015-41286) 12-07-2018 2RP-5133

Mr. Bratcher,

Under the new spill rule a work plan or closure report is due for the above release on 3/7/19. COG is currently conducting remediation at risk on the Pad portion of the release and is awaiting BLM clearance to address the pasture

portion of the release. COG is requesting a three month extension until June 7, 2019 in order to complete the remediation work and prepare a closure report.

Thank You,

Becky Haskell

Mr. Bratcher/Ms. Tucker,

Please find the attached C-141 for your consideration. Also, attached is the calculation sheet to determine the estimated release volume. The liquid lost estimate is based on the spill dimensions, estimated depth of fluid (wet soil depth) and type of formation. The spreadsheet will calculate the volume lost in the ground and does not include the recovered amount in the calculation. The calculated volume in the ground and the volume recovered were added together and reported on the C-141. If you have any questions or concerns please do not hesitate to contact me.

Thank you,

DeAnn Grant
