Ms. Venegas,

Under the new spill rule a work plan or closure report is due for the above release on 7/23/19. COG is currently backfilling this excavation. COG is requesting an one month extension until August 23, 2019 in order to complete a closure report.

Thank You,

Becky Haskell

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Mr. Bratcher/Mr. Mann,

Under the new spill rule a work plan or closure report is due for the above release on 4/23/19. COG is currently conducting remediation at risk. COG is requesting a three month extension until July 23, 2019 in order to complete remediation activities and prepare a closure report.

Mr. Bratcher/Mr. Mann,

Please find the attached C-141 for your consideration. Also, attached is the calculation sheet to determine the estimated release volume. The liquid lost estimate is based on the spill dimensions, estimated depth of fluid (wet soil depth) and type of formation. The spreadsheet will calculate the volume lost in the ground and does not include the recovered amount in the calculation. The calculated volume in the ground and the volume recovered were added together and reported on the C-141. If you have any questions or concerns please do not hesitate to contact me.

Thank you,

DeAnn Grant
