**Attachments:** DSC01350.JPG

Good Afternoon,

I forgot to send out another email regarding the sampling area while on location last week.

There is a lot of dying vegetation past the areas with visible chlorides. I am requesting the areas with stressed vegetation to be sampled and delineated if needed. Background samples will be at least 50 ft. past the impacted vegetation.

I will be available to meet on location with advance notice of 3 working days. Please do not hesitate to contact me if there are any issues or concerns.

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Got it! Thank you for the clarification!

I'd like to be on location when they begin delineation. Thank you.

Ms. Price,

BBC has this one scheduled for delineation and I believe either started delineation yesterday or the one call cleared yesterday and they will begin delineation soon on this spill and the one from 5/22/18 which is on top of this spill.

Thank You,

Becky Haskell
