DeAnn,

We have received your Workplan/Remediation Proposal for **2RP-5360 Burch Keely Unit Satellite G CTB**, thank you. This Workplan/Remediation proposal is denied. The proposed placement of vent holes in the SVE system is inadequate. The OCD prefers a passive system with many more equally spaced wells allowing for adequate removal of lighter hydrocarbon vapors. In the future, please include a signed dated C-141 page 5 with any remediation plan submittal.

Please let me know if you have any further questions.

Regards,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
